"Flugov" Plant in LENINGRAD, Leningrad RD

This material procured by  
Central Intelligence Agency

Legend:

- A "Flugov" Plant
- 1 "Santekh" plant, workshop for the production of sanitary installations, 100x65x40 ft.; it does not form part of the "Flugov" Plant
  - 2 Workshop, 330x100x40 ft., only equipped with forge-hammers
  - 3 Workshop, 330x100x40 ft., hardening and galvanizing shop. Sawing blades of all types and other tools were being hardened, galvanized and polished there
  - 4 Plumber shop, 33x33x13 ft., in charge of repair work in the plant
  - 5 Workshop, 500x200x40 ft. The shop was equipped with modern machine tools, such as lathes, milling and planing machines, punching machines and presses. The turbines represented in sketch 2 and made of highly polished light metal were manufactured in this shop. A circular light-metal case of a diameter of about 40 in. housed a turbine wheel with 30 to 40 blades, likewise of highly-polished light metal.
  - 6 L-shaped building, 265x165x65 ft., 33 ft. high. Various apparatus; men in white smocks worked at them
  - 7 Administration building, about 135x33x33 ft.
  - 8 Fire department, 135x50x25 ft., equipped with 3 or 4 Soviet fire engines
  - 9 Storage shed for iron rods and flat iron, about 265x35x16 ft.
  - 10 Mechanical workshop equipped with lathes, milling machines and joiner's benches. No details on production available
